INTRODUCTION

The financial transactions of California's county offices of education, school districts, and joint powers agencies for fiscal year 1990-91 are shown in the accompanying tables. Section 53892.1 of the Government Code provides that the State Superintendent of Public Instruction shall furnish to the State Controller the information which will permit the compilation of this report, and further that the State Superintendent of Public Instruction shall derive all data and other matters required by the State Controller from reports furnished by school districts or by county officials to the State Superintendent of Public Instruction as provided by law. Classifications of revenue and expenditures are in accordance with the account classifications prescribed in the California School Accounting Manual, 1988 Edition (ISBN 0-8011-0748-2)[1].

The sources of information are the annual attendance and financial reports of school districts, county superintendents of schools, and joint powers agencies. Information in the report is given as furnished and has not been audited by the State Controller. The tables and funds used to report this information are as shown in the table of contents.

Last year's report (1989-90) contained major format changes that were well received and have been continued for this year. These changes included the following modifications: 1) individual district/county/joint powers agency fund tables have been eliminated; 2) a new general information table has been created which displays total revenues, total expenditures, ending balance, average daily attendance, and bonded indebtedness for counties/districts/joint powers agencies; 3) the formal procedure for requesting additional data in hardcopy, PC diskette or IBM 9-track tape (see Addendum A) now includes a listing of the funds and object codes available; and 4) a listing of county and district appropriations limits (Gann Limit) are now included as Addendum B.

No new modifications were made in the report for fiscal year 1990-91.

School Districts

A total of 1,009 California school districts reported financial information that was used to compile this report. These districts were comprised of 608 elementary school districts, 105 high school districts, 291 unified school districts, and 5 common administration districts. Detailed general fund data is presented in the general information tables beginning on page 2. Summary data for all funds is presented on preceding pages. All information presented is a compilation of data submitted by the districts to the Department of Education using the J-200 series of reports.

1 This refers to the California Department of Education Publication Number used to request copies of the referenced manual.

County School Funds Transactions

There are 58 county offices of education in California. In addition to the many requirements of administering the schools in their jurisdiction, the county superintendents are also responsible for maintaining a balanced budget of their own funds. The financial transactions of all 58 county school service funds under the jurisdiction of county superintendents of schools are presented in the general information tables beginning on page 2. Summary information for all county funds may be found in the preceding pages. All information presented is a compilation of data submitted by each county superintendent of schools to the Department of Education using the J-400 series of reports

Joint Powers Agencies

The Joint Powers Act allows school districts to exercise existing powers by cooperative action. Section 41023 of the Education Code requires joint powers agencies which consist solely of school districts and county offices of education to file financial statements with the State Superintendent of Public Instruction subject to the same standards as school districts and county offices of education. The information contained in this report includes joint powers agencies conducting such activities as the operation of regional occupational centers and programs, special education programs, pupil transportation services, as well as other cooperative services. A total of 42 joint powers agencies reported the general fund data presented in the general information tables beginning on page 25. Summary information for all joint powers agencies' funds may be found in the preceding pages. All information presented is a compilation of data submitted by each by the joint powers agencies to the Department of Education using the J-600 series of reports.

SCHOOL DISTRICT FUNDS

The following summaries provide both a description and associated revenue and expenditure data for the various funds reported by California school districts.

Revenue/Expenditure Summary

The revenue, expenditures and ending balance details for all school districts, county offices and joint powers agencies are detailed in the General Information Table beginning on Page 2 of this document.

Average Daily Attendance

The average daily attendance (ADA) is a significant factor in the models used to allocate funds within California's education system. The average daily attendance by level follows.

	1990-91		1989-90		Percentage Increase (Decrease) Over Prior Year
	Amount	% of Total	Amount	% of Total

Building Fund

The Building Fund is the repository for the proceeds from the sale of bonds and is used to finance major capital outlays. The Education Code provides one major exception to this rule; whenever a school district which has received aid from the State School Building Aid Fund incurs additional bonded indebtedness, the proceeds from the sale of the additional bonds are to be applied first toward the reduction of the loans received from the State School Building Aid Fund in order to be eligible for further aid from this fund. In those cases where repayments were made from the proceeds of the sale of additional bonds, the repayments are shown as an expenditure from this fund.

A total of 246 districts reported transactions or an ending balance in the Building Fund. Of this total, 116 were elementary school districts, 28 high school districts, 100 unified, and two common administrative. As federal subventions for building purposes may be deposited directly into the State School Building Fund, the federal subventions shown in this fund do not necessarily indicate the total of such federal grants for construction purposes.

Special Reserve Fund

A Special Reserve Fund may be established by resolution of the governing body of a school district pursuant to Sections 42840 and 42841 of the Education Code. The purpose of such a reserve is to accumulate over a period of years funds to be used for capital outlay or other specified purposes. The number of districts reporting a Special Reserve Fund was 741. Of these, 456 were elementary school districts, 77 high school, 206 unified, and two common administrative. The fund details are shown on the following page.

State School Building Lease-Purchase Fund

The State School Building Lease-Purchase Fund is set up to provide for the financing of projects to be paid for wholly or in part from the receipts of the apportionments from the State School Building Aid Fund. Apportionments are made by the State to districts whose facilities are inadequate to accommodate the school population and whose bonded indebtedness is at the legal maximum. The State School Building Aid Fund is financed from statewide bond issues authorized for this purpose. The number of districts reporting transactions in this fund was 608. Of these, 357 were elementary school districts, 64 were high school districts, 185 were unified, and two were common administrative.

Cafeteria Fund/Account

A school district may exercise the option of handling cafeteria money through the county treasurer or of depositing the money in a local bank. If the cafeteria money is handled through the county treasurer, the accounting records are designated a Cafeteria Fund; and if handled through a local bank, the accounting records are designated a Cafeteria Account. It should also be noted that the financial trans-

Cafeteria Fund/Account (cont.)

actions of a Cafeteria Fund or Account may not represent the entire cost of the school lunch program of a particular district since certain expenditures for such programs may be met from the General Fund.

Pursuant to Section 39902 of the Education Code, persons employed by a school district for food service positions are a part of the classified service. It further states that wages, salaries, and benefits for all food service personnel shall be a charge against and paid from the General Fund or through the Cafeteria Fund of the district; however, such charges from the General Fund shall be excluded from the current expense of education. The governing board may, at any time, order reimbursement from the Cafeteria Fund or Account to the General Fund. The reimbursement from the Cafeteria Fund or Account shall be considered expenses of the Cafeteria Fund or Account and only those payments made from the General Fund which are not reimbursed from the Cafeteria Fund or Account shall be considered expenses of the General Fund.

A total of 913 districts reported financial transactions in a Cafeteria Fund or Account. Of this total, 527 were elementary school districts, 96 high school, 285 unified, and five common administrative.

Child Development Fund

The Child Development Fund is used to finance the operation of children's centers. Revenue is derived from state appropriations made expressly for this purpose and from fees charged for the admission of children to these centers. Certain administrative costs for operating a children's center may be paid from the general fund of the district; however a district may transfer, pursuant to Section 41013 of the Education Code, to the Child Development Fund the money necessary to cover these costs and show these costs as an expenditure of this fund rather than the general fund. The table on the following page displays the financial transactions in the Child Development Fund as reported by 228 districts. Of these, 91 were elementary school districts, 15 were high school, 119 were unified, and three were common administrative districts.

Adult Education Fund

Education Code Section 52616 requires the governing board of each school district receiving adult block entitlement funds for the purpose of operating an adult education program to establish an Adult Education Fund. During the current fiscal year, 234 districts reported transactions in this fund. Of these, 66 were high school districts, 163 were unified, and five were common administrative.

Deferred Maintenance Fund

The governing board of each school district may establish a Deferred Maintenance Fund for the purpose of major repairs or replacement of plumbing, heating, air conditioning, electrical, roofing, floor systems, and the exterior and interior painting of school buildings, or such other items of maintenance as may be approved by the State Allocation Board (Education Code Section 39618-39619.5). During the current fiscal year, 963 districts reported transactions in this fund. Of these, 569

Tax Override Fund

The Tax Override Fund provides for the repayment of voted indebtedness tax levies to be financed from ad valorem tax levies. An example is a state school building loan repayment. A total of 386 districts reported transactions with an ending balance in the tax override fund. Of the total districts reporting, 191 were elementary, 38 high school, 153 unified, and four common administrative.

Routine Repair and Maintenance Fund

Education Code Section 17714 required that a restricted fund be established for the exclusive purpose of providing moneys for regular maintenance and routine repair of school buildings. Chapter 1209, Statutes of 1989 (AB 181) amended this section to require the establishment of a restricted account in the General Fund, rather than a separate restricted fund. Amounts provided and expended for routine

Routine Repair and Maintenance Fund (cont.)

repair and maintenance activities now are reflected in the General Fund, for reporting purposes.

COUNTY SCHOOL FUNDS

County School Service Fund

All 58 counties reported transactions in the County School Service Fund. This is the primary fund normally used to account for the majority of the educational service functions of the county superintendents of schools. Total revenue reported for all counties amounted to $1,419,500,047 with total expenditures of $1,419,944,329.

Building Fund

The Building Fund is the repository for the proceeds from the sale of bonds and is used to finance major capital outlays. During the last fiscal year, three counties reported transactions or an ending balance in the Building Fund. As federal subventions for building purposes may be deposited directly into the State School Building Lease-Purchase Fund, the total revenues for this fund may not include all such federal grants for construction purposes. Total revenues of $1,598,492 and total expenditures of $2,847,696 were reported.

Special Reserve Fund

A Special Reserve Fund may be established by resolution of the county board of education. The objective of such a reserve is to accumulate, over a period of years, funds to be used for capital outlay or other specified purposes. The number of counties reporting a special reserve was 35, with a total revenue of $17,976,257 and total expenditures of $10,644,891.

State School Building Lease-Purchase Fund

Twenty-eight counties reported transactions in this fund for total revenues of $8,513,186 and total expenditures of $7,830,377.

Cafeteria Fund/Account

Only two counties reported financial transactions in a Cafeteria Fund or Account for a total of $179,310 in revenues and $154,705 in expenditures.

Child Development Fund

The Education Code authorizes the establishment of children's centers by county superintendents of schools. During the current fiscal year, 20 counties reported transactions for this purpose. Revenue in the amount of $63,630,386 was reported and expenditures were reported as $63,566,230.

Deferred Maintenance Fund

This fund is established for the purpose of major repair or replacement of plumbing, heating, air conditioning, electrical, roofing, floor systems, and the interior and exterior painting of school buildings or other such items of maintenance as may be approved by the State Allocation Board. Forty-two counties reported activity or ending balances in this fund with a total revenue of $5,422,600 and expenditures of $3,722,437.

JOINT POWERS AGENCY FUNDS

General Fund

A total of 32 joint powers agencies (JPAs) reported transactions in the General Fund. Total revenue reported for all JPAs was $79,597,473 with total expenditures of $82,118,213.

Special Reserve Fund

A Special Reserve Fund may be established by resolution of the governing body of the joint powers agency. The objective of such a reserve is to accumulate, over a period of years, funds to be used for capital outlay or other specified purposes. Five JPA's reported special reserve activity with total revenues of $178,473 and total expenditures of $377,597.

Deferred Maintenance Fund

This fund is established for the purpose of major repair or replacement of plumbing, heating, air conditioning, electrical, roofing, floor systems, and the interior and exterior painting of school buildings or other such items of maintenance as may be approved by the State Allocation Board. Only one JPA reported activity in this fund. Total revenues were $359,347 and expenditures were $228,203.

ADDENDUM A

(Ordering Instructions for Additiona! Data)

EXTERNAL DATA REQUESTS
(Ordering Instructions)

The data which makes up this report is contained in a database maintained by the Department of Education which allows reporting in virtually any format required. Data is maintained at the source/object level by fiscal year, fund, county, and district. At this time only the 1987-88 through 1990-91 fiscal years data is available, however it is anticipated that the database will contain at least the last five (5) fiscal years for comparative purposes.

Data may be requested in hard copy, IBM PC (ASCII, Lotus, dBase), or IBM 9-track tape formats by contacting the Department of Education as follows:

Department of Education
School Business Services Division
560 J Street - Room 590
Sacramento, CA 95814
(916) 322-6008

Generally, individual requests for data in hard copy or PC readable form cost $50 per request, and database dumps on 9-track tape cost $250 for the first year of data plus $50 per year for each additional year on the same tape. A cost estimate will be prepared by this office for large requests, and all data requests will be filled upon receipt of payment.

Additional information regarding the database structure and data elements available can be obtained without charge from the same office. The following section displays the major components of the department's databases:

Database Descriptors

The California Depoartment of Education received financial data from school districts, county offices of education, and joint powers agencies. This data is maintained in databases for reporting and analyses purposes. Each of these databases allows information to be retrieved using the following general descriptors:

Major Groups:

Fiscal Year	1987-88, 1988-89, 1989-90, etc.
County	County code and Name
District	District Code and Name
District Type	Elementary, High School, etc.
Fund	General Categories of Expenditure and Revenue
Object Code	Specific Categories of Revenue and Expenditute

The schedules on the following pages list the specific fund and object information available:

ADDENDUM B
(District Appropriations Limit [Gann Limit] Summary)

APPROPRIATIONS LIMIT AND TOTAL ANNUAL APPROPRIATIONS SUBJECT TO THE LIMIT

California voters in November of 1979 passed Proposition 4, known as the "Gann Limit," which added Article XIIIB to the state Constitution. Article XIIIB was designed to be a limit on the spending of local governments, including school districts.

As a result, each school district is required to compute a 1978-79 "base year" appropriations limit. Once the base year is calculated, subsequent years are computed using the previous year's limit modified by changes in cost of living, population, and other adjustments.

Neither Article XIIIB nor any subsequent legislation assigned any state or local government agency responsibility for assuring compliance with the mandates. However, Section 12463 of the Government Code, as amended by Chapter 1025, Statutes of 1987, requires the State Controller's Annual Report of Financial Transactions Concerning School Districts to include their appropriations limitation and the total annual appropriations subject to the limitation.

Districts that did not submit the necessary information have not been listed in this year's publication. The information in this table is unaudited and is presented as submitted by the school districts.
